Paingottoor

### TENTH | 2015-2016

10 CGPA|Central Broad Secondary Education| Vimal Jyothi  
Public School, Njarakkad

## PROJECT

**Medcomai:** Location-based ai powered online blood bank platform along with health management. We used flutter to create a mobile app.

**Ajcecaf:** This was a web app created for our college canteen. We found that a huge crowd was gathered every time in our cafeteria, not even able to order food on time. To overcome this problem, I developed a web app where students can pre-order food items and payment can be done online. Built on HTML, CSS, and Javascript.

**Location-Based Alarm App:** The location alarm is an android app that can give you an alarm based on a particular location. Additionally, the application would help you to find out how far is the destination. Built with Java as part of my internship project.

## WORK EXPERIENCE

### Andriod Developer

i-Era Technical Solutions LLP | FEB 2019-JULY 2019

- Andriod Developer

### Front End Developer

Seventy3 | AUG 2020 - FEB 2020
